CLEANING (MAINTENANCE)

- 1 Keep your pistol away from dusty, damp and acidic environments.
- **2** After firing, lubricate and clean the chamber inside the barrel.
- ${\bf 3}$ Lubricate the parts especially Slide and Magazine after cleaning.
- ${\bf 4}$ Do not keep more than two cartidges inside the magazine, if you are not going to use for a long time.
- **5** In case the pistol does not work, use another brand cartidges. If the problem continues, please ask for help from the dealer where you bought the pistol. By using right hand finger thumb, press the magazine button backwards and at the same time pull the magazine downwards by your right hand. And take out the magazine completely from its housing. Fill the cartidges into the magazine. Push filled magazine in its house with the same direction again. Pull the slide of the pistol which is filled with cartidge backwards and release. With setting the cartidge to the barrel the pistol becomes ready for firing From this time to press trigger is enough for firing. After **14** shots you must repeat the same process.

SAFETY

To maintain the safety of your pistol, you should turn the safety downside

TO DISMANTLE

Hold your pistol in safe position. Take out the magazine from its place. Turn the slide stop downside and take it out from its housing. "[if the pistol isn't in safety position, you can't take the slide stop out.] "Turn The take down batch as shown. And remove it from its place by pulling it out." After pulling slide to the end of backwards, lift the end of the slide up. With holding the same angle push the slide which escapes from the bearings of the frame forward. For maintenance there is no need to dismantle any other parts on the pistol. You can mount your pistol, by begining from reverse side of dismantling steps of the pistol.
